ESTILL'S SCHOOL CHIEF DIES

Irvine, Ky., Sept. 28.—Sherman Land, 40 years old, county school superintendent of Estill county, died here after a short illness. Funeral services were held Wednesday morning at Winston. LOCAL ELEVEN HAVE SCRIMMAGE

The Richmond football fans who were out at the Normal field Wednesday afternoon got their first view of the game when Eastern and Madison Hi held a spirited scrimmage which was marked by some corking good plays. Eastern kicked off to Madison and the high school boys were held for downs while Eastern, with the ball in their possession, carried it down the field for a touchdown. This was the last that they made and the only score of the day. The Madison boys at this point seemed uncertain, and played rather an erratic game, and seemed to be a little flustered at the task of stopping the big Eastern men. The Maroon and White warriors overweighed their Madison opponents many pounds and tore great holes in the line.

Here Coach Hembree inserted one or two substitutes which seemed to put new life in the Purples. They took advantage of Eastern's fumbles and held them on the defensive for quite a while. Ralph Gentry prevented trouble with a tackle which spilled Harris that was a dandy. He made a nice dive in bringing Harris to the ground. Toward the latter part of the contest Hembree had his entire line composed of inexperienced men who gave good accounts of themselves. With them in the line, Madison had a little the upper hand. Previous to this the Purple had become more steady and were playing consistent football.

Both squads were put through a light workout before the scrimmage which consisted principally of signal work. The football curtain raises here Friday when Madison locks horns with Stanford Hi. Eastern is putting in her work in preparation for a trip to Winchester, Saturday where she meets Kentucky Wesleyan College.

HERE'S THE BOY

EARL COMBS

HISLE TO CAPTAIN COMBS DAY TEAM

"Pete" Hisle, well known local boy, will be the manager of the Richmond baseball nine which will meet the Louisville Colonels with Earl Combs in the line-up in the Eastern diamond October 12. He also will play second base. "Pete" is a finished player in the infield as well as a dangerous man with the willow. He first attracted notice at Washington-Lee University where he was the star third sacker for three years, being captain of that nine his last year there which was 1921. His last two years on the W. & L. nine were his best. He led the team in batting in '20 and '21 with averages over .350. It is said that he was the best infielder ever produced at the university. Hisle spent two summers with the Salisbury, North Carolina club in the Old Hickory League where he gave a good account of himself. Last year he finished the season with the Lexington Reos who were considered one of the best semi-pro outfits in the state. At present he is playing with the Winchester club in the Blue Grass circuit where he has been throughout the season. He received two flattering offers from Rochester, of the International league, and Augusta, of the Southern league this year but preferred to play nearer home. Ty Cobb is the principal stockholder in the last named club.

The Wallace farm, which was in the hands of Mr. L. W. Dunbar, the popular salesman of the Freeman Realty Company, was sold at public auction Thursday morning to Mr. S. F. Winkler of Irvine. The consideration, it is understood, was \$10,302. This is considered by the owners and others who attended the sale as a good price and again the Freeman Realty Company was proved to be right up to the minute in conducting these farm sales they have been making for the past few months.

KENTUCKY SYNOD AT BOWLING GREEN

Dr. R. L. Telford is in Bowling Green attending the annual meeting of the synod of Kentucky of the Southern Presbyterian church which convened in the First Presbyterian church, at Bowling Green, Tuesday, at 8 o'clock, with a sermon by Rev. Cary R. Blain, Moderator and pastor of the First Presbyterian church Paducah.

The synod of Kentucky now has on its roll 101 ministers, 157 churches and 20,705 members. Special interest is attached to certain important matters appearing on the program for consideration and discussion: (1) Inasmuch as the synod is now engaged in a special campaign for Christian education, it is expected that an interesting report will be filed by the joint commission in charge of the educational movement in which \$100,000,000 will be raised for the educational institutions of Kentucky. When the proposition was first submitted, suggesting that a definite and comprehensive plan be devised for the benefit of the schools and colleges, the Southern synod at once adopted the suggestion and communicated it to the Northern synod. As soon as the idea was accepted by the Northern synod, the joint commission was created and preliminary steps in the campaign arranged.

DOES LAUNDRY WORK AND HOUSEWORK TOO

Surprised to Find Her- self Feeling So Well

Taunton, Mass. — "I used to have pains
in my back and legs so badly, with other
troubles that women
sometimes have, that
my doctor ordered
me to stay in bed a
week in every month.
It didn't do me much
good, so one day after
talking with a friend
who took Lydia E.
Pinkham's Vegeta-
ble Compound for
about the same trou-
bles I had, I thought
I would try it also.
I find that I can work in the laundry all
through the time and do my housework,
too. Last month I was so surprised at
myself to be up and around and feeling
so good while before I used to feel com-
pletely lifeless. I have told some of the
girls who work with me and have such
troubles to try Lydia E. Pinkham's Vege-
table Compound, and I tell them how it
has helped me. You can use my testi-
monial for the good of others." — Mrs.
BLANCHIE SILVIA, 59 Grant St., Taunton,
Mass.
It's the same story—one friend telling
another of the value of Lydia E. Pink-

CLAIMS CREDIT FOR ARMY TANK

British Captain Says Great War
Weapon Was Invented by
Him in 1914.

GOT ORDERS FROM KITCHENER

Credit for Invention Has Been Claimed
in Many Quarters, Notably by Winston Churchill—Question in Parliament.

London.—One of the few really new weapons which the late war developed was the tank. Credit for this invention has been claimed in many quarters—notably for Winston Churchill, new colonial secretary, who was said to have submitted it to Mr. Asquith on January 5, 1915.

Now the Morning Post has come forth with a claim for Lord Kitchener and a Captain Bentley, under whose joint auspices, the newspaper asserts, the first tank was produced. The controversy has come to light again through the inability of Captain Bentley to obtain from the tanks award committee of the war office any award or compensation for his work.

The real story of the genesis of the tank, according to the Morning Post, is this:

On October 18, 1914, Captain Bentley had just returned to England from abroad to offer himself for war service. The next day he received a telephone call from Colonel Fitzgerald, military secretary to Lord Kitchener, directing him to report at the war office in Whitehall. When he arrived there he was taken to Lord Kitchener, under whom he had served in South Africa and to whom he was well known.

Real Story of Tank.

Kitchener, the story runs, greeted him as follows:
"Downstairs, in the quadrangle, there's an armored car Woolwich has made for me. It's the result of the united brains of the army and navy experts. We want it for this trench fighting which they've begun in France. Go down, have a look at it and tell me what you think about it." Captain Bentley and Colonel Fitzgerald inspected the car for about five minutes and then returned.

"Well?" Kitchener asked.

"It's no good for your purpose," Captain Bentley said. "You can't take it off a road."
"Exactly," said Lord Kitchener. "My own opinion. Now, can you design me one of the right type? It's urgent. Let me have it tomorrow."

Captain Bentley, it might be mentioned, was one of the pioneers of motor transport. He had driven automobiles in sandy wastes, and had devoted considerable time to the attempt to develop types of motor vehicles suitable to rough and virgin country. He went home to work out the idea of the caterpillar tractor as it would be applied to an armored car.

On the evening of October 22, Captain Bentley went to Lord Kitchener's house in Carlton Gardens. At the end of three hours the two men, according to Captain Bentley, had agreed upon the basic principles of the tank.

At the close of the interview, Captain Bentley mentioned that he proposed to go at once to the patent office and register his design.

"Wait," Lord Kitchener said. "Are you satisfied to leave this in my hands? I'll look after you."

Find Kitchener Is Dead.

Captain Bentley agreed. The next week, however, he left for service in Russia. Upon his return to England, he was almost immediately recommissioned and sent to German East Africa with the mechanical transport service. Here he was wounded, finally returning to England in 1917.

Until this time he did not know that the invention, which by then was known as the "tank," had ever been utilized. What he did know, however, was that Lord Kitchener had been drowned in June, 1916, and could not give his version of the tank's origin.

Destructive of knowing the official view of the matter, Captain Bentley had a question asked in parliament. The answer gave the credit for the invention of the tank to Winston Churchill, January 5, 1915, a date which, Captain Bentley's claims he verified, was about two and a half months after the Kitchener interview.

MOVE BLIND ACROSS TURKEY

Near East Relief Workers Send 100
Children From the American
School to Syria.

Aleppo, Syria.—One hundred blind children from the American school for the blind at Harpoot have arrived here safely after a 500-mile hike across the Turkish interior, during which they passed through mountains infested with bandits and over long stretches of desert where camels carried water and provisions.

The children are from seven to fifteen years old. The irregular pilgrimage is part of the plan of the Near East relief to remove several thousand Armenian orphans from Asiatic Turkey. The journey from Harpoot took a month to complete. On the last 29 miles the children floated down the Euphrates on barges. They now are housed in the re-established school in Aleppo, which is the capital of Syria under the French mandate.
